COMPANY OVERVIEW

Project InVision International (PII) provides software solutions to improve business performance to professional service firms and their clients including industry leaders like PricewaterhouseCoopers, KPMG International, AT&T, EDS, and TELUS. Project InVision's enterprise and on-demand platforms help businesses automate processes such as Project Portfolio Management (PPM); Governance, Risk, and Compliance (GRC); and Professional Services Automation (PSA). Our customers benefit by improving their productivity, reducing operational costs, and mitigating risks. Project InVision software has been implemented at more than 500 service and project-intensive businesses worldwide, with 30,000 seats deployed to manage tens of thousands of engagements.

COMPANY HISTORY

Matthew Meblin, a long-time innovator in project management technology, and Andy Shotz co-founded Project InVision International in 1991 as a project management consultancy providing services to Fortune 500 corporations. In 1994, the company released the first version of the Project InVision software platform to serve the growing project portfolio management marketplace. It also began the transition from consulting firm to software company. The Project InVision 7.0 platform's expanded capabilities now support multiple business processes including Project Portfolio Management, Governance Risk and Compliance and Professional Services Automation.

INNOVATIVE PROCESS MANAGEMENT SOLUTIONS

Project InVision International provides clients with a way to improve their bottom line and achieve competitive advantage by improving business processes and delivering on promises.

Project InVision Project Portfolio Management

Automate the essential business processes of your project life-cycle, based on best practices and lessons learned, to ensure that risks are mitigated, projects are delivered successfully, and intended benefits are realized.

Project InVision Governance, Risk, and Compliance

Enable your audit and compliance teams by automating the essential business processes associated with financial, Sarbanes-Oxley, and other regulatory audits.

Project InVision Professional Services Automation

Drive increased visibility, governance, and control, leading professional services firms to increased profitability and higher client satisfaction.

PARTNERS

PII is the only business performance improvement software provider that enables its partners to embed their processes, methodologies, and best practices into co-branded software, promote and sell to their clients, and share in the software revenue stream. PricewaterhouseCoopers, EDS, KPMG International, and AT&T are just a few of the leading system integrators and professional services firms that have developed strategic alliances with PII.

THE PROJECT INVISION DIFFERENCE

On-Demand Business Performance Improvement

Our hosted solution can be up and running in days, with no software or hardware to buy, build, or maintain.

Unprecedented Adaptability

Extraordinary adaptability – without programming – allows you to tailor the software to suit your needs and processes.

Comprehensive Process Management

One integrated solution ensures that information flows seamlessly throughout your organization.

State-of-the-Art Security

Project InVision's security infrastructure ensures that the data your business depends upon is never compromised.

Setting Success as the Standard
