

Project InVision announces the formation of Project InVision Mexico **Mexico City based firm will deliver project management solutions to Mexican corporations**

MEXICO CITY, Mexico and SAN FRANCISCO BAY AREA, California, US – March 22, 2011

Project InVision International, a leading provider of cloud-based software solutions, today announced the formation of Project InVision Mexico, a Mexico City based firm that will introduce the Project InVision software platform to the Mexican market.

Project InVision provides software solutions to govern repeatable project delivery, improve resource utilization, and promote visibility and collaboration. Project InVision's cloud-based solutions consistently achieve the industry's fastest deployment times, enabling customers to focus on strategic initiatives rather than laboring over the implementation of project management systems.

"We have found that Mexican companies are ready to embrace project management solutions with open arms," said Juan Monroy, President of Project InVision Mexico. "Project InVision has provided solutions in the U.S. for over 20 years; we are pleased to become their exclusive distributor in Mexico."

"We believe the time is right to enter the Mexican market and become an integral part of their emerging economy," said Andy Shotz, President of Project InVision International. "We are excited to be joining with the skilled team of Project InVision Mexico to introduce our many benefits to Mexican companies."

About Project InVision Mexico
